

### INSTALLATION INSTRUCTIONS

**P73015, P73032**

### INSTALLATION INSTRUCTIONS

#### THANK YOU FOR CHOOSING KALLISTA

We appreciate your commitment to Kallista quality products. Please take a moment to review this manual before you install your Kallista product. If you encounter any installation or performance problems, please do not hesitate to contact us at the phone number listed at the bottom of the page.

#### BEFORE YOU BEGIN

- These instructions are for installing the dressing table (P73015) and pre-cut marble top (P73032).
- Observe all local plumbing and building codes.
- Prior to installation, unpack the new dressing table and marble top and inspect them for damage. Return the dressing table and marble top to their protective cartons until you are ready to install them.
- Refer to the dressing table specification sheet for P-trap and supply location recommendations. Verify your supply valves and P-trap will not interfere with the shelf and drawer. Install the water supply and drain lines. The water supply nipples must extend 3" (76 mm) beyond the finished wall material.
- These instructions are for installing the dressing table to wood frame construction. For other installations, supply suitable bracing and fastening devices of sufficient size and strength.
- Provide 2x6 backing material in the finished wall. The height from the top of the 2x6 backing material to the floor must be 36-1/4" (921 mm).
- This installation is recommended to be done with a minimum of two people.
- The marble top can be installed with three different faucet configurations:
  - "Single-Hole" for a monoblock faucet
  - "Three-Hole" for a widespread faucet
  - "No-Hole" for a wall-mount faucet
- All dimensions given assume that the floor and walls are square, plumb, and level. Make appropriate adjustments for other conditions.
- Remove any moldings that may inhibit the dressing table from being flush against the finished wall.
- Make sure the path of the shelf will not be obstructed as it slides open.
- Kallista reserves the right to make revisions in the design of products without notice, as specified in the Price Book.

#### TOOLS AND MATERIALS

Tape Measure

Pencil

Level

Drill

Hex Wrench

Safety Glasses

Hammer

File

Clear 100% Silicone Sealant or Caulk

#### Plus

- Conventional woodworking tools and materials, as appropriate
- Hole Saw
- Wood Screws
- Screwdriver

## INSTALLATION INSTRUCTIONS

### 1. INSTALL THE DRESSING TABLE

- Measure and mark 36-1/4" (921 mm) up from the floor. This will be the height from the top of the 2x6 backing material to the floor.
- Secure the 2x6 backing material to the studs with framing nails.
- Install the water supply and drain lines. The water supply nipples must extend at least 3" (76 mm) beyond the finished wall material.
- Complete the finished wall. Make sure that the finished wall is straight and plumb, and that the floor is flat and perpendicular to the finished wall.

**IMPORTANT!** Do not install any moldings that may inhibit the dressing table from being plumb against the finished wall.

### 2. TEST FIT THE DRESSING TABLE

- Position the dressing table against the finished wall.
- Verify the dressing table is level front to back and side to side. If necessary, adjust the levelers on the bottom of the dressing table.
- Mark the supply and drain locations on the inside of the dressing table back wall. Move the dressing table away from the wall.
- Cut the marked supply and drain locations from inside of the dressing table back wall using a hole saw.
- Position the dressing table against the wall, aligning the supply and drain locations with the cut holes on the dressing table back wall.

## INSTALLATION INSTRUCTIONS

### 3. MARBLE TOP HOLE FABRICATION (OPTIONAL)

- ❑ Three faucet holes have been partially drilled from the underside of the console top.
- ❑ On the top, show surface, of the marble top, locate the center of the required faucet holes. Using a compass or circle template, draw a circle for the required holes.
- ❑ Using a small hammer, create the faucet hole(s) by gently tapping the console top within the circles until the marble breaks away.

**NOTE: DO NOT** strike the console top with too much force. **DO NOT** strike from the bottom side of the console top. This will damage the top surface of the console top.

- ❑ Using a file or sanding cylinder, complete the removal of marble material to create a clean round hole.

## INSTALLATION INSTRUCTIONS

### 4. INSTALL THE MARBLE TOP

**NOTE:** If using a lavatory with overflow, ensure that the lavatory is installed with the overflow to the front of the marble top and dressing table.

- Install the lavatory and faucet to the marble top at this time. Refer to the lavatory manufacturer's instructions for proper lavatory installation. Refer to the faucet manufacturer's instructions for proper faucet installation.
- With the help of an assistant, place the marble top on top of the dressing table. Verify correct fit and alignment of all components. Adjust as necessary.
- With the help of an assistant, carefully remove the marble top and set aside.
- Drill two pilot holes through the mounting rail and finished wall on each side of the dressing table. Make sure the two pilot holes are spaced a minimum of 16" (406 mm) apart from one another.
- Tighten a wood screw through each of the two drilled holes until the dressing table is flush and secure against the finished wall.
- Apply clear 100% silicone caulk or sealant to the top of the dressing table.
- With the help of an assistant, replace the marble top on top of the dressing table. Verify correct fit and alignment. Adjust as necessary.

### 5. COMPLETE THE INSTALLATION

- Install the P-trap according to the manufacturer's instructions.
- Connect the water supply and check all connections for leaks. Repair as needed.

## INSTALLATION INSTRUCTIONS

### 6. REMOVE/ADJUST THE DRAWERS

#### To remove the drawer:

- Slide the drawer out on the rails until fully extended.
- Pull both release latches toward you, then pull the front of the drawer up off the rails.
- Lift the drawer out from the dressing table.

#### To reinstall the drawer:

- Fully extend the rails.
- Align the grooves on the underside of the drawer with the rails and set into place.
- Hold the drawer in place on the rails with one hand. With your other hand, pull the tab on the bottom front of the rail toward you until you hear the rail "snap" into place. Repeat this step for the remaining rail.
- Ensure the drawer is locked into place by lightly lifting the front of the drawer upward. If the drawer does not lift up, it is engaged. If the drawer lifts up, repeat the above procedure.
- Slide the drawer in and out of the dressing table to ensure smooth operation.

#### Adjustment:

- Slide the drawer out on the rails until fully extended.
- Turn the drawer height adjustment wheels to adjust the drawer height. To lower the drawer, turn the wheel on the left side of the drawer clockwise and/or the wheel on the right side of the drawer counterclockwise. Turn the wheel(s) in the opposite direction to raise the drawer.
