INSTALLATION

How to Install the Spout

Install the mounting studs(3) onto the underside of basin body(1), and put the adhesive washer(2) into the bottom groove of the basin mixer over the hoses(4) and mounting studs.

Insert the basin mixer assembly into the basin hole. Position the basin mixer properly. From underside, place the washers (5, Rubber washer is on the top) onto the mounting studs, and tighten nuts(6, 7) to secure the basin mixer.

Attach the hoses to water supplies. The hose with red mark should be connected to hot water, the hose with blue mark should be connected to cold water.

INSTALLATION CHECKOUT

Ensure that all connections are tight. Ensure the handle is in the off position. Turn on the main water supply, and check for leaks. Repair as needed.

Remove the aerator kit(8) with a coin. Turn on the basin mixer. Run hot and cold water through spout for about one minute to remove any debris. Remove any debris from the aerator kit. Shut off the basin mixer. Reinstall the aerator kit.

CLEANING INSTRUCTIONS

All Finishes: Clean the finish with mild soap and warm water. Wipe entire surface completely dry with clean soft cloth. Many cleaners may contain chemicals, such as ammonia, chlorine, toilet cleaner etc. which could adversely affect the finish and are not recommended for cleaning.

Do not use abrasive cleaners or solvents on Kohler faucets and fittings.
