

16364 16366 10377 10109 37432 HANDSPRAY WITH HOSE

BEFORE YOU BEGIN

All information is based on the latest product information available at the time of publication. Kohler Co. reserves the right to make changes in product characteristics, packaging, or availability at any time without notice.

Please leave these instructions for the consumer. They contain important information.

NOTES:

1. Flush the water supply pipes thoroughly to remove debris before installation.
2. The highest working pressure for handspray & shower head is 0.5MPa(5 bar). If it exceeds 0.5MPa(5 bar), a pressure reducer is needed. The highest water and environment temperature is 60 °C. Please keep handspray, shower head and the shower arm away from heater, or it may become damaged and cause injury to the user.

INSTALLATION

Filter washers(1) provided with shower hose(2) must be installed in each end of hose(2). For **16366/10377**, put the washer(4, thickness 5mm) instead of washer(1) at the end which connect to the handspray.

For **37432**, Put the check valve(5) into the handspray(3) inlet. Put the restrictor(6) into the handspray inlet if needed.

Note: Keep the O-ring of the check valve outward.

Connect shower hose to handspray(3) and the water supply.

How to Clean the Nozzles

The furriness or debris may cause flowstream distorted or reduce the flowrate. To clean up the furriness or debris, run water through the handspray, firmly press or rub your finger back and forth across the rubber spray holes.

CLEANING INSTRUCTIONS

All Finishes: Clean the finish with mild soap and warm water. Wipe entire surface completely dry with clean soft cloth. Many cleaners may contain chemicals, such as ammonia, chlorine, toilet cleaner etc. which could adversely affect the finish and are not recommended for cleaning.

Do not use abrasive cleaners or solvents on Kohler faucets and fittings.
