New KOHLER Command Pro Engines Deliver Big Power in Small Package

Two new models offer long-lasting commercial performance; feature convenient “drop-in” design

KOHLER, Wis. – KOHLER[®] is proud to be expanding its durable lineup of Command Pro[®] single cylinder, horizontal-shaft engines with new 4.5 and 5.5 horsepower models. The two new engines are designed with industry-standard dimensions, offering equipment manufacturers the convenience of a “drop-in” design. For the benefit of rental customers and other end users, the new engines also feature a large-capacity fuel tank for longer runtimes as well as Kohler’s exclusive Quad-Clean[™] all-season, four-stage cyclonic air filter, which provides advanced engine protection in tough-and-dirty conditions.

“These new engines are in the sweet-spot for powering a wide variety of equipment found around most jobsites,” said Cam Litt, marketing manager for KOHLER Engines. “We’ve integrated several design features to deliver longer runtimes, all-weather performance, and the overall reliability required by today’s users. Plus, we’re backing both models with our limited three-year commercial warranty for added peace-of-mind.”

Other notable features incorporated into the new 4.5 and 5.5 horsepower KOHLER Command Pro engines include: a new twist-off air cleaner cover for easy maintenance; an electronic ignition and advanced combustion system to reduce fuel consumption; cast-iron cylinder liners, dual ball bearings and a forged crankshaft for long engine life; and Kohler’s innovative Oil Sentry[™] system, which automatically shuts the engine down in low-oil conditions.

For more information about these two recent additions to the KOHLER Command Pro single cylinder, horizontal-shaft engine line, please visit www.KohlerEngines.com or call 800-544-2444.

Kohler has manufactured engines for more than 90 years and has continually enhanced its product lineup in an effort to help make life easier and more profitable for end users around the globe. The company offers a full array of gasoline, diesel and gaseous-fueled engines – up to 134 hp. – which are supplied to equipment manufacturers worldwide in the lawn and garden, commercial and industrial, agricultural and construction markets.
