Kohler's Gaseous-Fueled Mobile Generators Recognized with Award

Leading resource for specifying engineers places Kohler mobile generators among best new products

KOHLER, Wis. – *Consulting-Specifying Engineer (CSE)*, a premier resource for professional engineers who design mechanical, electrical, electronic and related systems for commercial, industrial and institutional projects, recently designated Kohler Power Systems' gaseous-fueled mobile generators one of the best new products of 2015. *CSE* recognized the liquid-propane gensets in the Emergency, On-Site, and Standby Power category within its 2015 Product of the Year program.

"We're pleased that *CSE* readers selected our gaseous-fueled mobile generators as one of the best new products of 2015," said Anne Feudner, product manager for Kohler Power Systems. "These mobile generators are connecting with end users because they run on environmentally-friendly fuels and can help reduce fuel costs by 15 to 20 percent, when compared to comparable diesel units."

Kohler's industry-leading gaseous mobile generator line is engineered to provide reliable power in any situation from disaster recovery and special events to serving as primary power at construction sites or backup power at water utilities, commercial retail and healthcare facilities. The line can easily switch between optional on-board LP fuel tanks and external LP liquid, LP gas or natural gas fuel sources. The on-board LP tanks are built for a 24-hour run time while connection to an external LP or natural gas supply offers extended usage. Optional add-ons like cam-locks and a voltage selector switch can also be integrated, based on a user's specific needs.

About *Consulting-Specifying Engineer*

Consulting-Specifying Engineer (www.csemag.com) provides content serving the nonresidential building industry. It covers mechanical, electrical, plumbing, and fire/life safety engineering for commercial, industrial, government, health care, and high-tech buildings. The magazine is published by CFE Media LLC.

About Kohler Power Systems

Kohler Power Systems, a division of Kohler Co., provides complete power systems, including generators (residential, industrial, mobile, portable, and marine), automatic transfer switches, paralleling switchgear, monitoring controls, and accessories for emergency, prime power and energy-management applications. Kohler Power Systems has delivered energy solutions for markets worldwide since 1920. For more information, visit www.kohlerpower.com.

About Kohler Co.

Founded in 1873 and headquartered in Kohler, Wis., Kohler Co. is one of America's oldest and largest privately held companies comprised of more than 30,000 associates. With more than 50 manufacturing locations worldwide, Kohler is a global leader in the manufacture of kitchen and bath products; engines and power systems; premier furniture, cabinetry and tile; and owner/operator of two of the world's finest five-star hospitality and golf resort destinations in Kohler and St Andrews, Scotland. For more details, please visit to kohler.com.
