

GOVERNMENT BACKUP POWER

for Industrial Power Systems

WE PROTECT AMERICA'S POWER.

For more than 50 years, Kohler has provided backup power to every branch of federal, state and local government. We understand your specialized backup power requirements. That's why we provide you with dedicated account managers who live and breathe government operations, both CONUS and OCONUS.

Our commitment to you is twofold. We'll provide reliable, state-of-the-art equipment, and we'll make the entire process easy—from first quote to approved installation.

WHY KOHLER?

THE SMART CHOICE FOR GOVERNMENT AGENCIES

At Kohler, we don't do one size fits all. We help create custom solutions for you and your agency. But the care doesn't end there. We'll be by your side every step of the way to make sure the job's done right.

VALUE ENGINEERING

KOHLER® products are 100% compatible and designed to work seamlessly together, ensuring complete system reliability.

Our products are prototype and production-tested to ensure maximum performance and quality.

WE OFFER PRODUCTS THAT MEET THE FOLLOWING CODES AND STANDARDS:

EPA Emission Certification
IBC Seismic Certification
NFPA 110
UL 2200
California OSHPD

TRUSTED CUSTOMER SERVICE

Dedicated government account managers
Government contract vehicles
Rapid quote delivery
Superior service and support across CONUS and OCONUS

TECHNICAL EXPERTISE

Fully customizable offerings
Complete power system solutions: standby, continuous and prime
Easy-to-use, highly programmable controls
State-of-the-art technologies
Remote and local enterprise monitoring and control
Program management, logistics and installations/start-ups

FEDERAL GOVERNMENT EXPERIENCE

The following agencies have trusted KOHLER Power Systems:

- USDA
- DOC/NOAA
- Defense
- DHS
- Energy
- HUD
- Interior
- State
- Treasury
- DOT/FAA
- VA
- EPA
- NASA
- USPS
- TVA

KOHLER
IN POWER. SINCE 1920.

CUSTOM POWER FOR GOVERNMENT APPLICATIONS

STANDBY GENERATORS (SIN 335999)

- Natural gas/LP-fueled models to 1000 kW
- Diesel-fueled models to 4000 kW
- Exceptional motor starting and voltage recovery
- Configurable to a variety of system needs
- Generators meet NFPA 110 requirements for start time and are all G3-rated per ISO8528-5

MOBILE GENERATORS (SIN 335999)

- Diesel and gaseous models from 30 to 175 kW Tier 4 Final and EPA-certified
- Minimum of 24-hour runtime fuel tanks with 110% containment
- Voltage selector switch for multiple options
- Sound-attenuating enclosures for quiet operation
- Intuitive, user-friendly controls
- Limited three-year warranty

MARINE GENERATORS (SIN 335999)

- Generators from 4 to 500 kW
- 50/60 Hz frequency adjustable
- EPA emission-compliant

PORTABLE GENERATORS (SIN 335999)

- Gasoline-fueled models from 2 to 12.3 kW

AUTOMATIC TRANSFER SWITCHES (SIN 335999)

- Automatically transfer power from the utility to the generator and back
- Seamlessly integrate with KOHLER® power systems
- Standard and custom options from 30 to 4000 amps
- Integrated communication options
- Service entrance, nonautomatic, automatic and bypass configurations

PARALLELING SWITCHGEAR (SIN 335999)

- Customizable to your specifications and facility needs
- Compatible with all diesel and gas generator sets
- Intuitive user interface

KOHLER DECISION-MAKER®/APM CONTROLLERS (SIN 335999)

- Designed for generators 5 to 4000 kW
- Programmable to meet all applications
- Features network and remote communication

SUCCESS STORY

The Federal Aviation Administration's (FAA) standby power contract, supporting the National Airspace System's (NAS) critical applications, was awarded to Kohler in 1995 and has been reawarded to Kohler every contract period since then.

As a result, Kohler has supplied hundreds of mobile and fixed generator sets, transfer switches and switchgear to major support centers and critical facilities. Kohler also provides technical service and systems training, logistical staging and aftermarket parts support 24/7, 365 days a year.
