GM93357-KP1-QS
Oil Pan Heater Kit, 120 VAC

GM93357-KP2
Oil Pan Heater Kit, 240 VAC

Applicable Models

- 24RCL
- 30RCL
- 38RCLB

Description

The oil pan heater kit warms the oil pan making starting easier and warmup quicker. The oil pan heater kit is recommended in climates where the temperature falls below 0°C (32°F). The oil pan heater kit adheres to the surface on the bottom of the oil pan and turns on when the temperature at the thermostat falls below approximately 4°C (40°F) and turns off when the temperature rises above approximately 16°C (60°F).

- Provides an extra degree of weather protection
- Keeps a generator performing in harsh conditions
- Available for 120 VAC and 240 VAC

The oil pan heater requires a continuous source of AC power. The generator set must be connected to an AC power source that is backed up by the generator set.

At temperatures below -18°C (0°F), installation of both an oil pan heater and an engine block heater is recommended.
