Why WasteLAB™?

Driven by sustainable innovation, KOHLER® WasteLAB transforms landfill-bound manufacturing materials into striking, functional products for the home.

Every piece is handcrafted with care and precision, reflecting our dedication to sustainability, thoughtful design, and enduring quality.

Handmade by Artisans

Our distinct offerings carry the warmth and craftsmanship of the artisan's touch to bring timeless charm to any space.

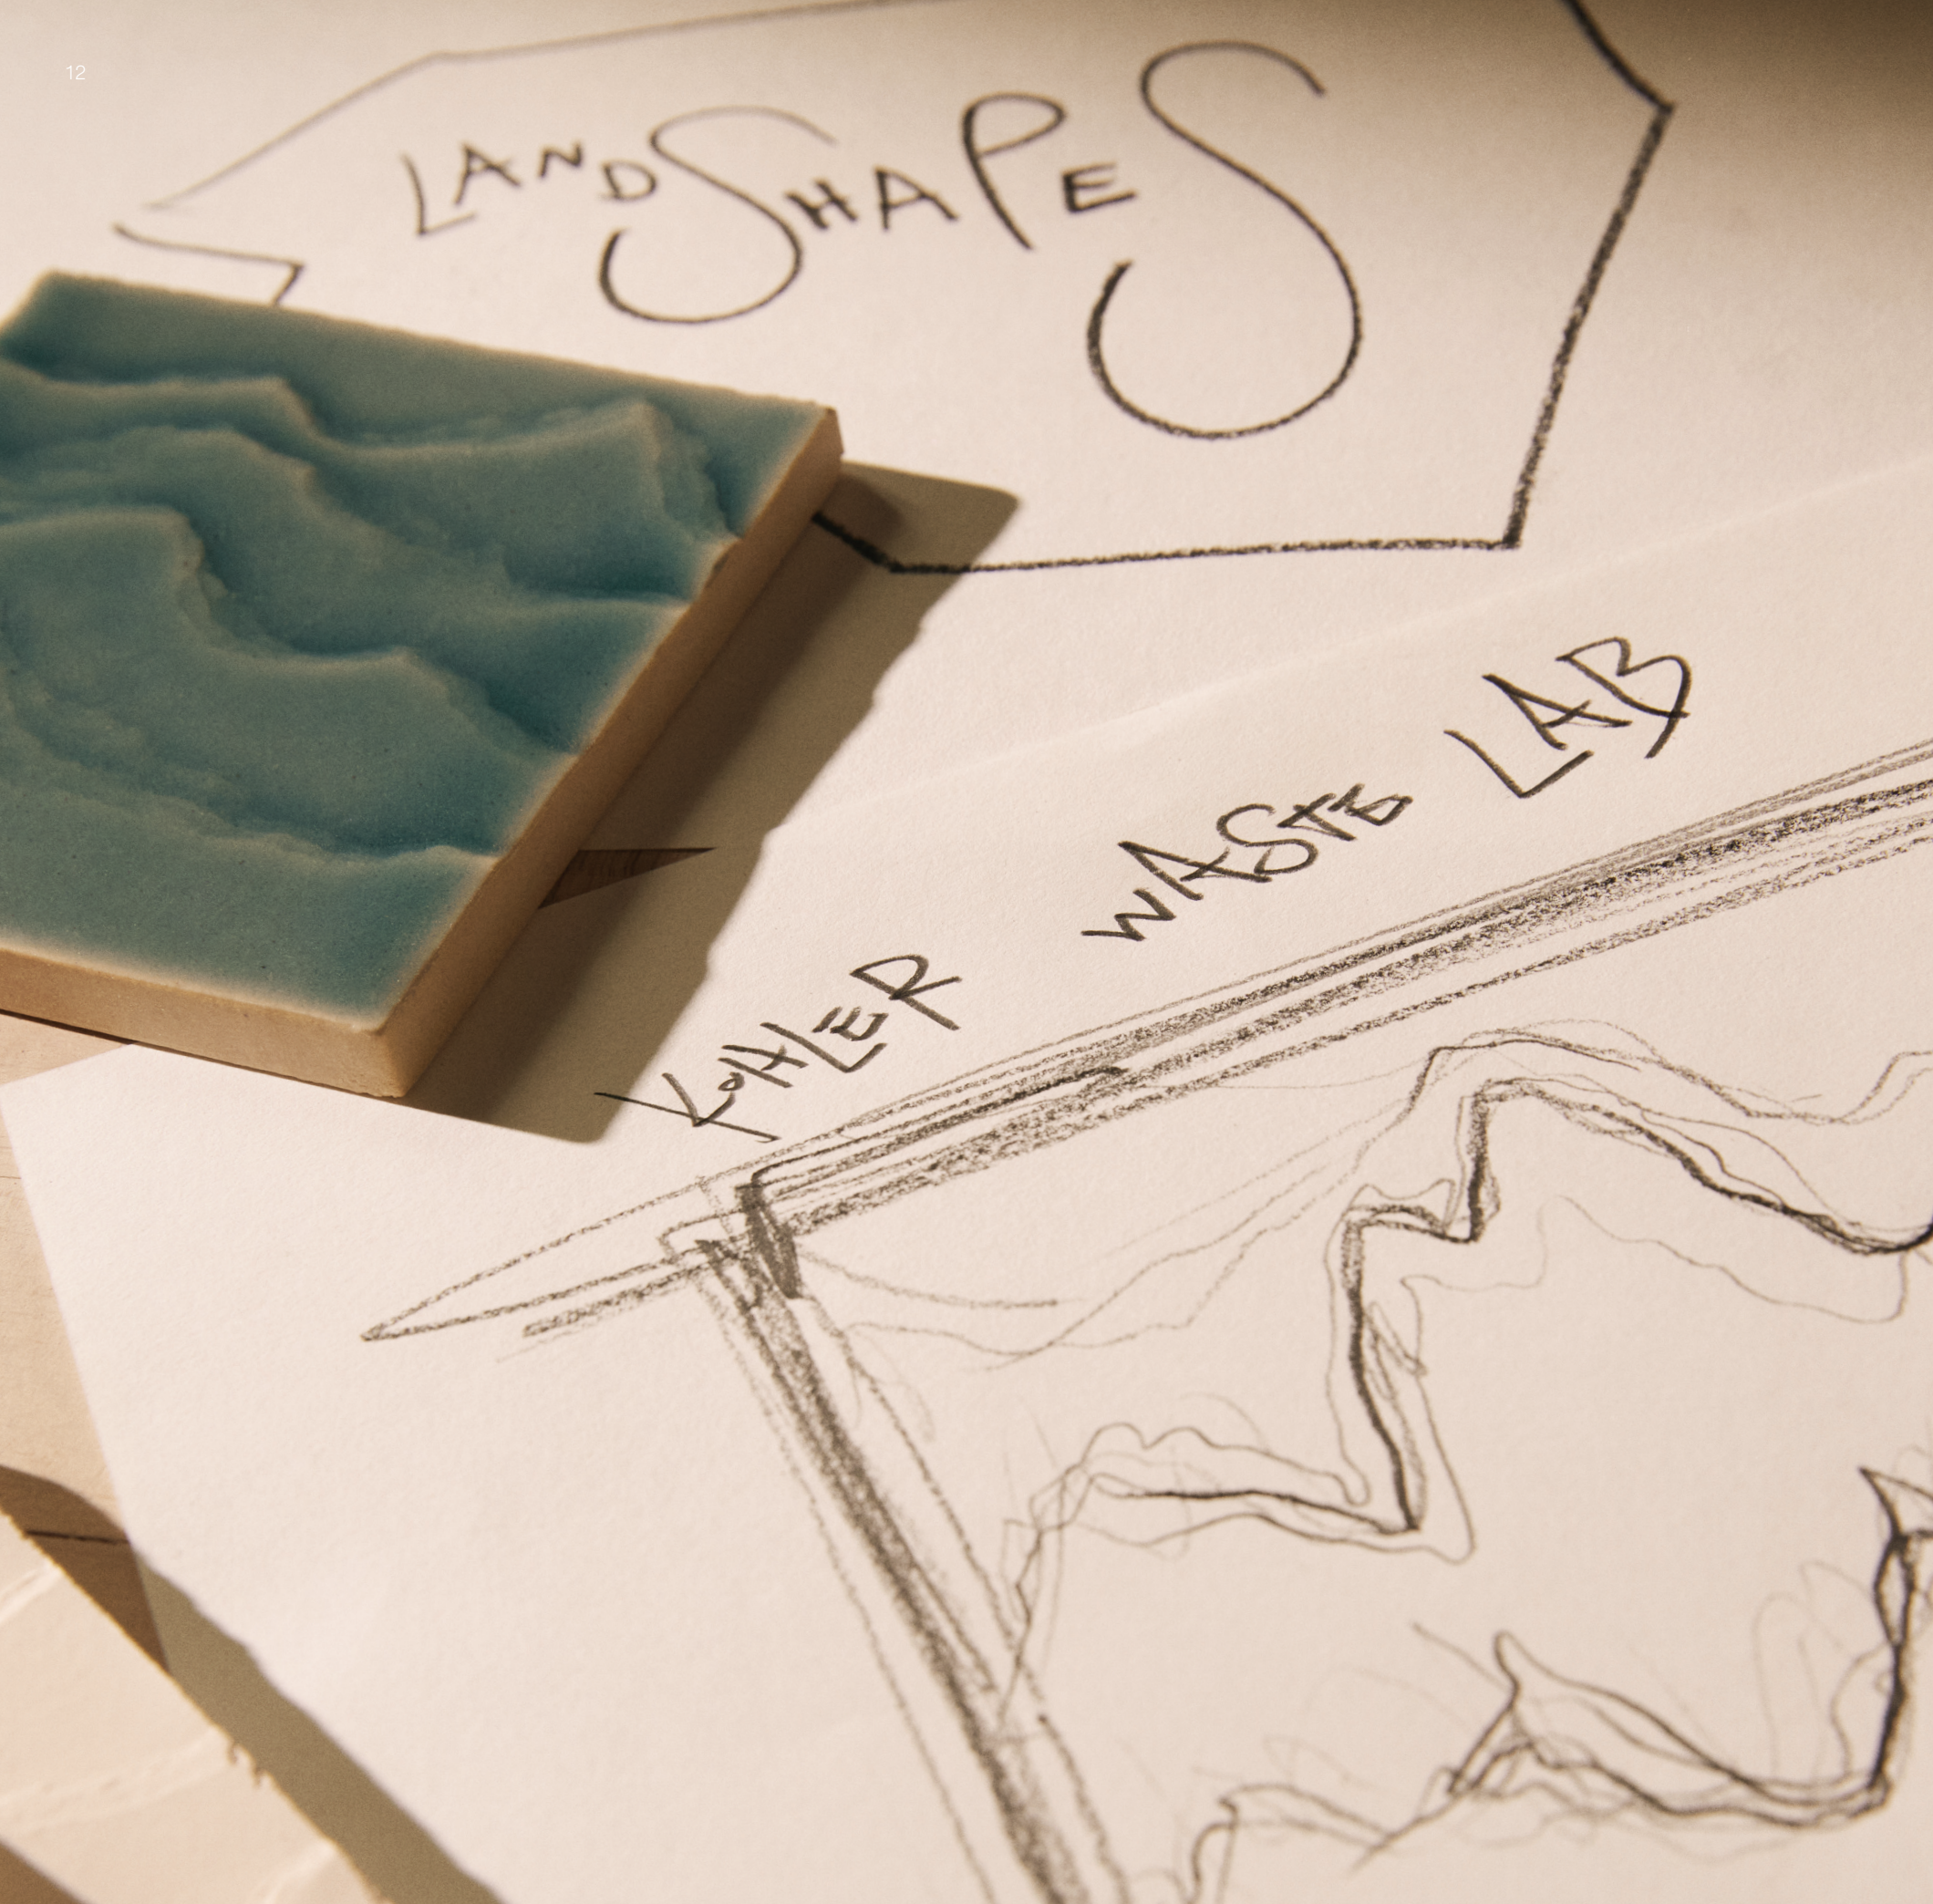

Sustainable by Design

WasteLAB™ products are made from at least 70% recycled material, redefining what beautiful, eco-friendly design can be.

Made in the U.S.A.

All WasteLAB™ products are made in Kohler, Wisconsin, underscoring a commitment to our customers and local communities with more reliable supply chains and stable pricing.

Valuable Partnerships

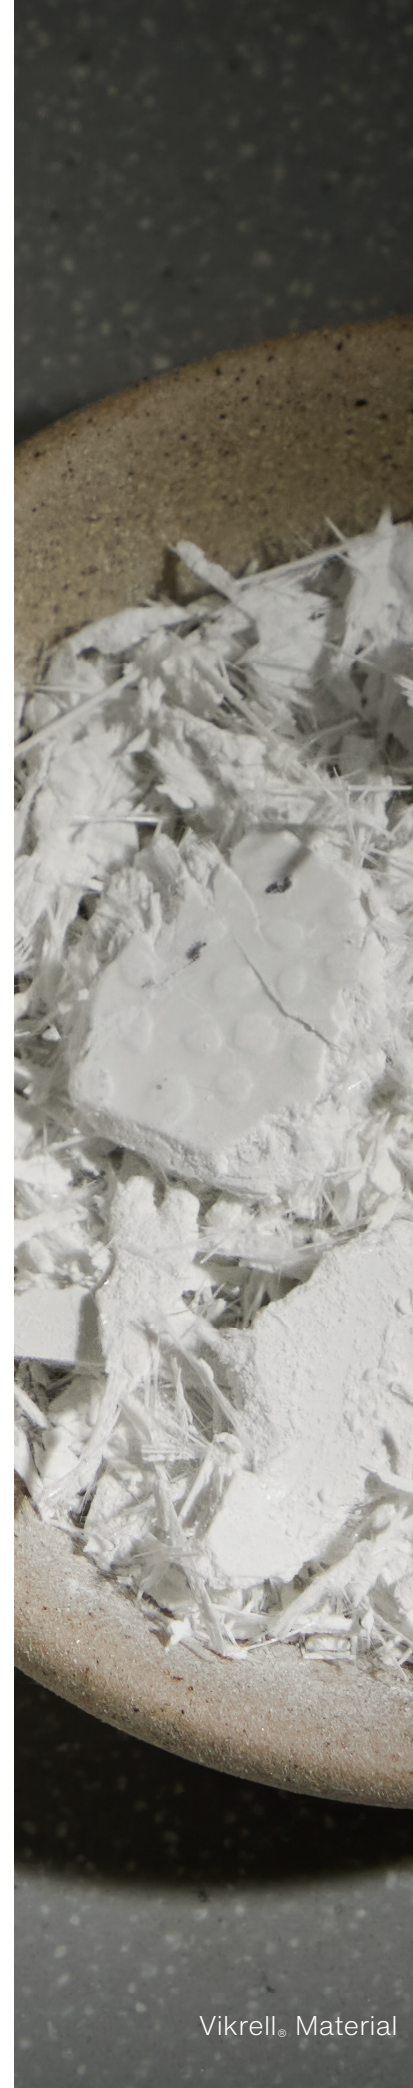

We collaborate with talented creatives to bring distinct, one-of-a-kind offerings to the market, including two of our latest tile collections—Landshapes® with artist Daniel Arsham and Transcendence with designer Nada Debs.

Forward-Thinking Innovations

WasteLAB™ is always searching for innovative ways to transform manufacturing waste streams into elevated, beautiful products of sustainable expression.

Materials Reimagined

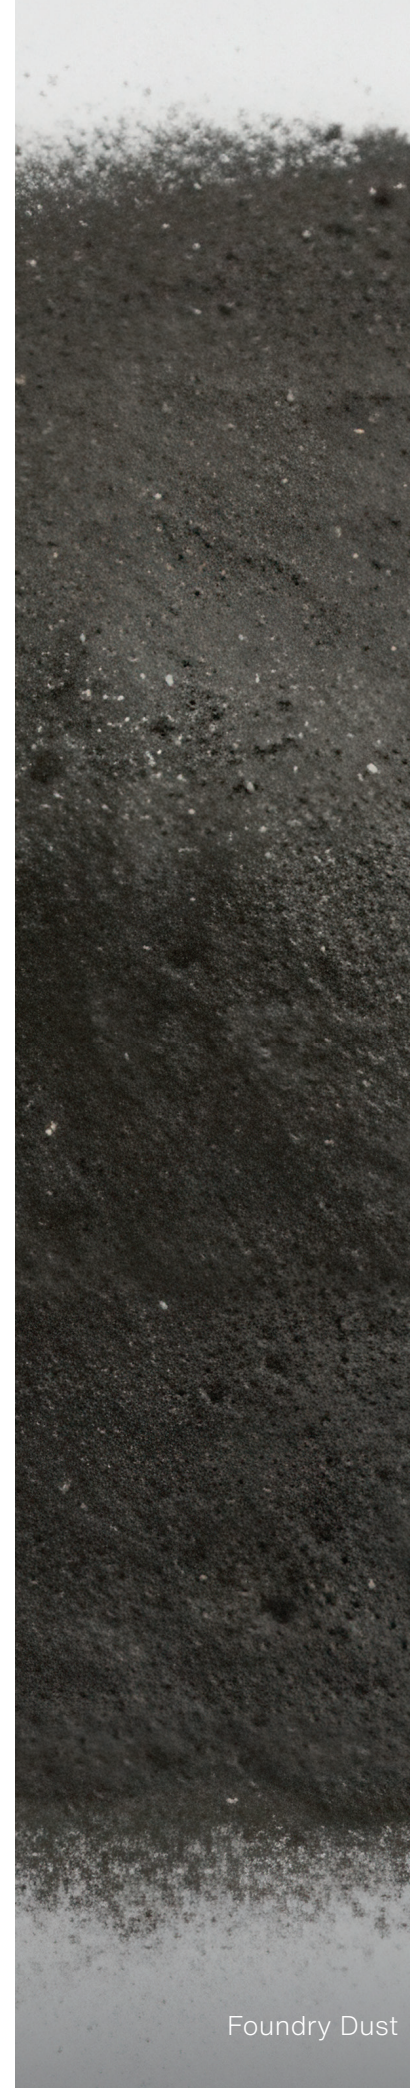

WasteLAB™ begins where others end, transforming manufacturing by-products into reimagined materials with renewed purpose. Across our product offerings, each waste stream is thoughtfully reprocessed. Unfired pottery cull and dehydrated filter cake become the foundation of our tile bodies, while impurities drawn from cast iron slag lend nuanced color to select finishes to form surfaces that carry both history and intention.

Vikrell® Material

Cast Iron Slag

Foundry Dust

Dry Pottery Cull

Pottery Filter Cake

Vitreous Cull

Waste Enamel Powder

Waste Glaze

Foundry Sand

Each piece created in the WasteLAB™ embodies material alchemy—diverting waste from landfill and elevating it into enduring designs where handcrafted sustainability is not an afterthought, but the origin of its beauty.

This consistent philosophy shapes every product in our collections.

Tiles

WasteLAB® tiles are tactile surfaces full of movement, texture, and history. Each collection is a beautiful expression of thoughtful design and sustainable artistry.

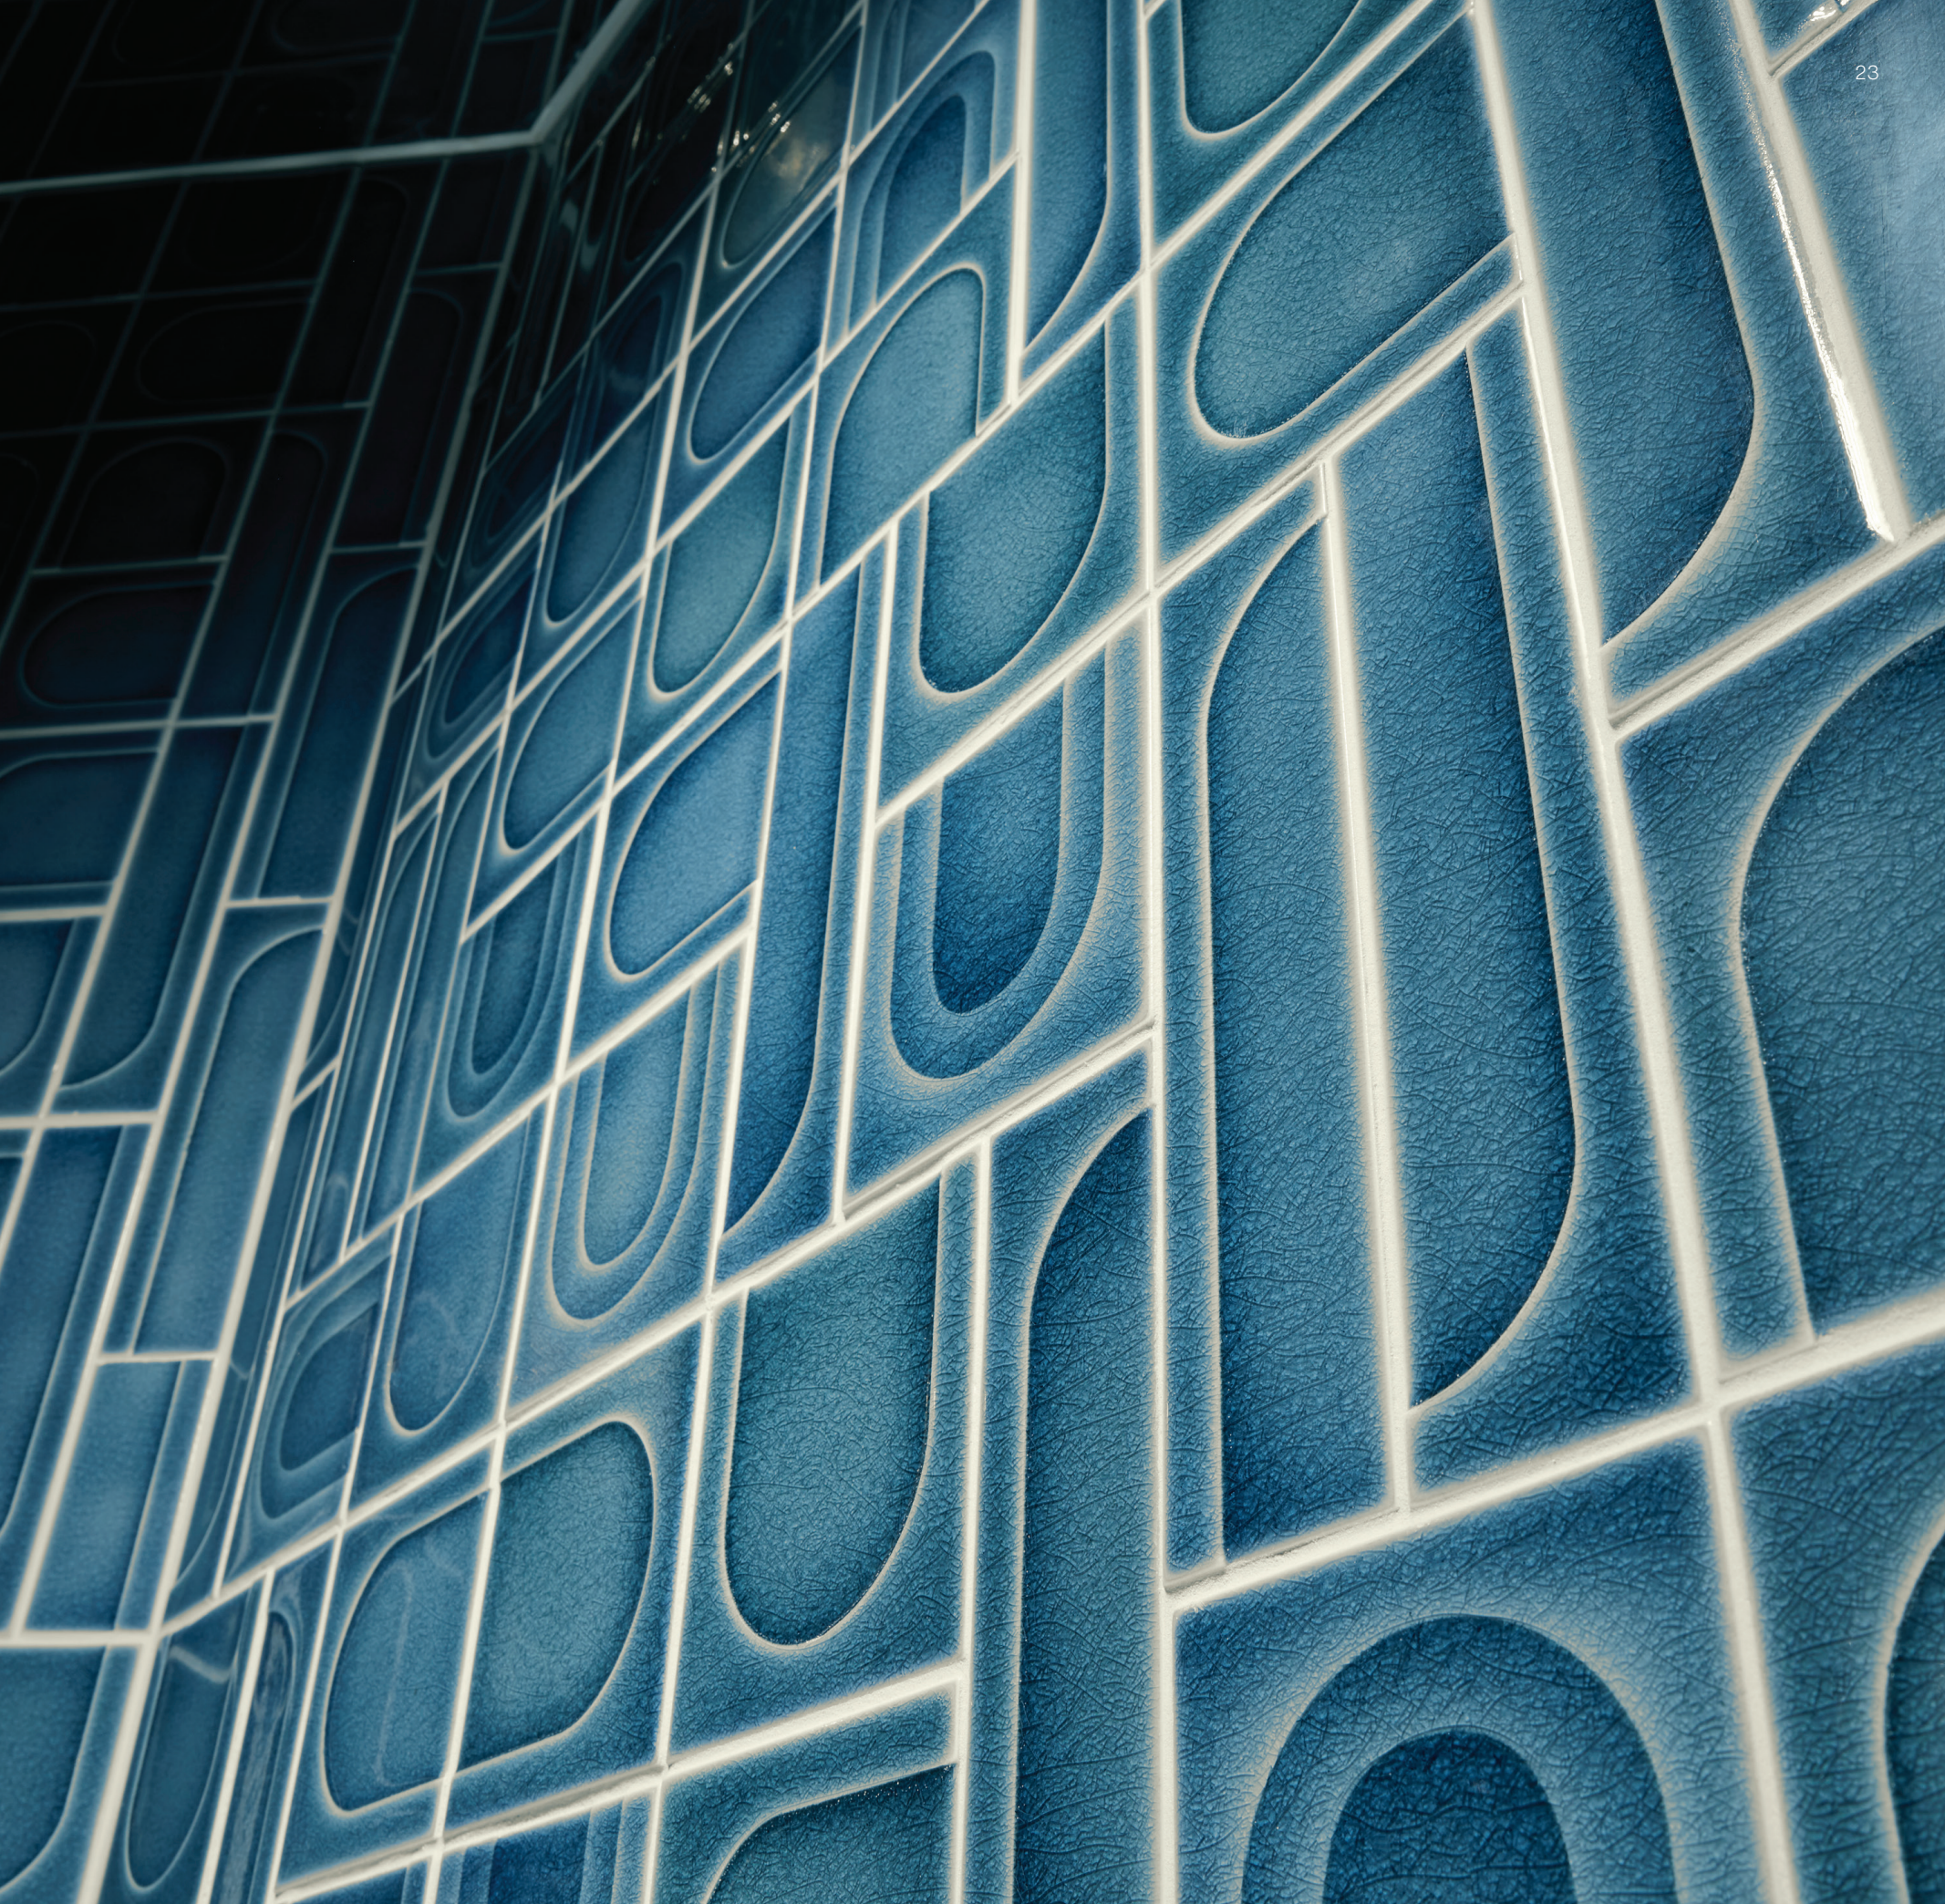

Landshapes®

Landshapes tiles capture the natural rhythm of erosion and shifting earth—the moment when coastal tides meet sandy shores. Designed in collaboration with artist Daniel Arsham, the collection brings layered depth and quiet, organic movement to any surface.

Transcendence

Drawing from the serenity of a traditional hammam, Transcendence tiles explore ritual and renewal through soft arches and playful modular shapes. Created with designer Nada Debs, the meditative geometry of this collection offers a soulful connection between material rebirth and spiritual reflection.

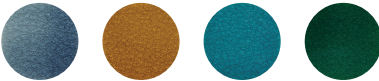

Abstra®

The Abstra tile collection balances softness and structure with gently brushed surfaces and the tactile appeal of carved clay. These tiles lend dimension through a refined simplicity that feels both timeless and modern.

Crackle

Made from recycled dry cull, the Crackle tile collection embodies the alchemy of transformation through fire. A custom glaze reveals deep color and signature cracks, creating a richly expressive design with bold, elemental energy.

Sinks and Planters

Sculptural in form, WasteLAB™ sinks and planters celebrate beauty born from reinvention. Thoughtful details and recycled content come together in pieces that elevate the everyday.

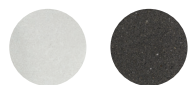

WasteLAB™ Vox®

With smooth curves and a minimalist profile, the WasteLAB Vox sink pairs sculptural form with sustainable innovation. Made from 70% recycled material, these sinks bring grounded elegance to the bathroom with a soft, stone-like presence.

WasteLAB™ DemiLav®

Handcrafted in small batches, the WasteLAB DemiLav sink reflects the individuality and care of true artisanal craftsmanship. Its terrazzo-inspired surface and softly refined silhouette bring timeless elegance to the bathroom, balancing modern texture with a more classic sensibility.

WasteLAB™ Planter

Composed of 75% repurposed material, each WasteLAB planter is handmade to showcase an organic beauty shaped by the warmth and care of an artisan's touch. Over time, the planters develop a graceful patina that reflects nature's quiet strength.
