

**Record your model number below for future reference:**  
Observe all local plumbing and building codes.

**Important Information**  
For new installations, assemble the faucet to the sink before installing the sink.  
Shut off the water supply.

**Important Information**  
Your product may appear different than the one illustrated. The installation procedures remain the same.

**1** Remove the spout supply hose and mixed water supply hose from the sidespray diverter. Set the sidespray diverter aside.

**IMPORTANT!** Pay attention to which hose goes to which port of the diverter.

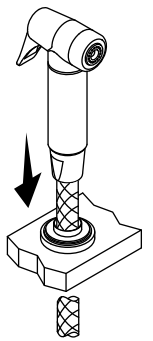

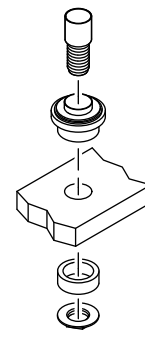

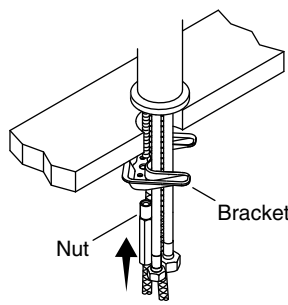

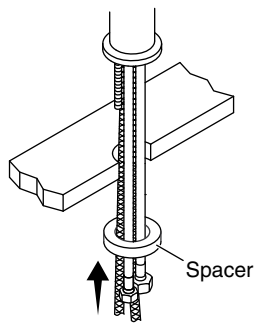

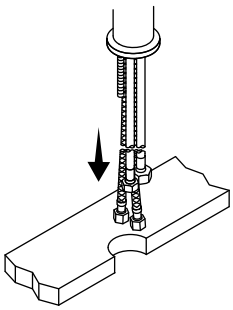

**2** Insert the faucet hoses and stud into the faucet hole.

**3** For thin mounting surfaces, slide the spacer up over the hoses to the bottom of the faucet hole.

**4** Position the faucet. Slide the bracket over the stud. Tighten the nut to secure the faucet.

**5 For Optional Sidespray:** Assemble the sidespray holder. Install the spacer above the nut if needed.

**6 For Optional Sidespray:** Install the sidespray.

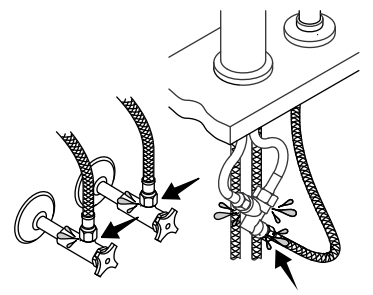

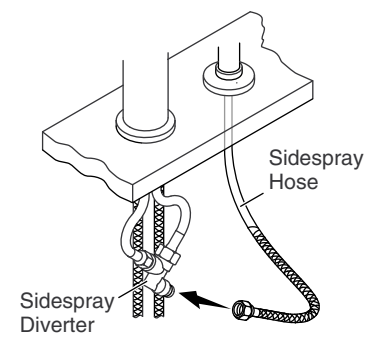

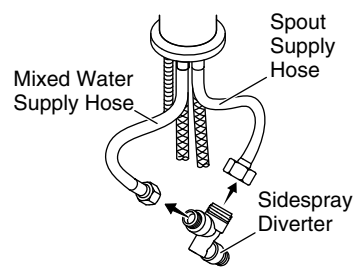

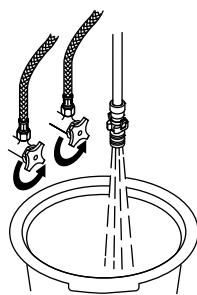

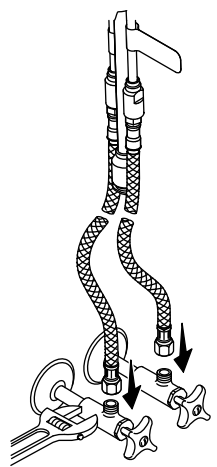

**7** Connect and tighten the supply hoses.

**8 For Optional Sidespray:** Turn on the water supplies. Flush the hot and cold water for 1 minute.

**9** Reconnect the spout supply hose and mixed water supply hose to the sidespray diverter.

**10 For Optional Sidespray:** Connect the sidespray hose to the sidespray diverter.

**11** Turn on the water supplies and check for leaks.

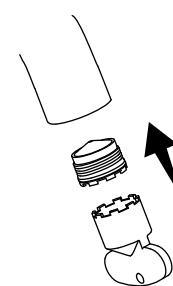

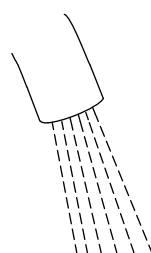

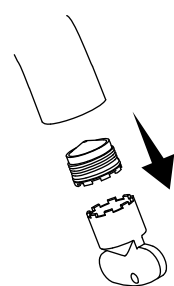

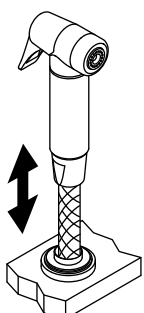

**12** Check the sidespray for smooth operation.

**13** Use the provided key to remove the aerator.

**14** Run the water for 1 minute to remove debris.

**15** Use the provided key to reinstall the aerator.
