

23491T-4 2 Handle Wall Mount Bath Faucet

\*\*Color code must be specified when ordering.

**NOTE:** For all Asia pacific regions (excluding China) add SP (SPxxxxxx\*\*) in front of the part number when ordering.

23491T-4 2 Handle Wall Mount Bath Faucet

**BEFORE YOU BEGIN**

All information is based on the latest product information available at the time of publication. Kohler Co. reserves the right to make changes in product characteristics, packaging, or availability at any time without notice.

Please leave these instructions for the consumer. They contain important information.

**NOTES:**

1. Flush the water supply pipes thoroughly to remove debris.
2. Inspect the supply tubing for damage and leakage. Replace and maintain as necessary.
3. Observe local plumbing codes.
4. Check for leaks before covering the pipes, repair as needed.
5. Please ensure only apply water pressure test on the product, and empty the air in pipe and faucet thoroughly before the test. Please ensure test pressure below 0.8MPa and test duration within 30 minutes.

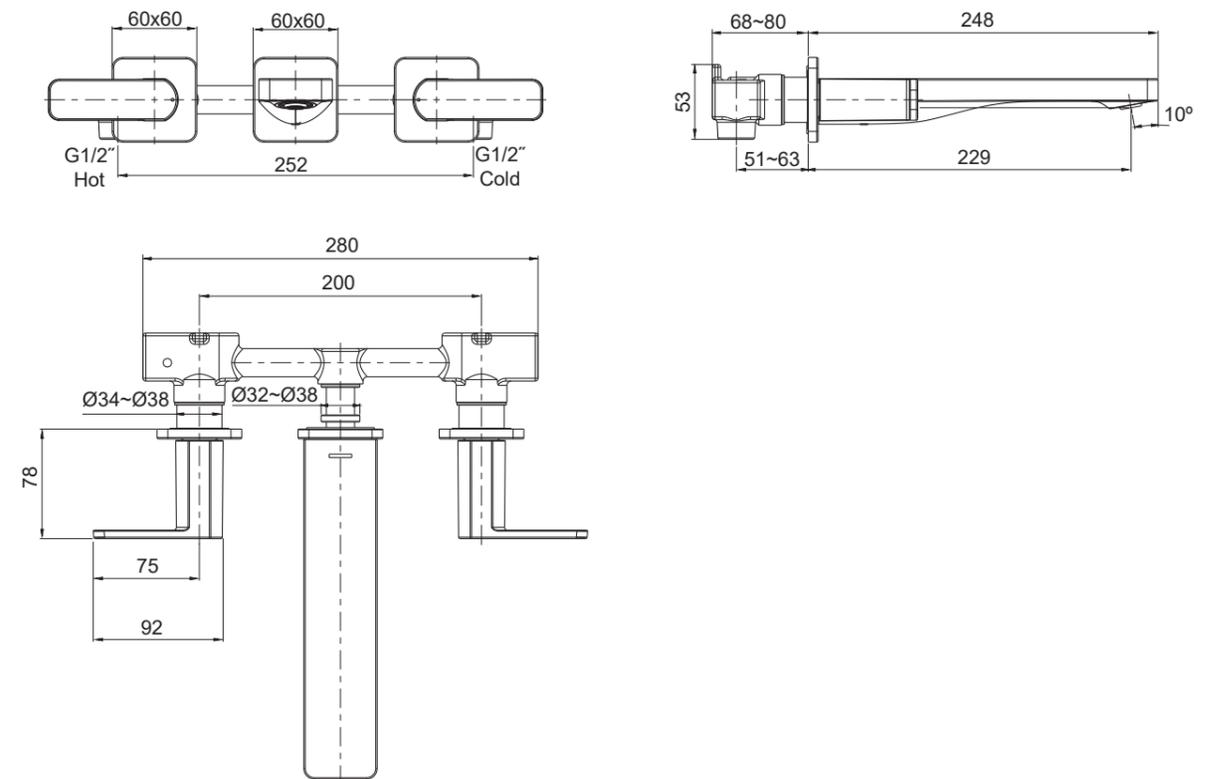

**HANDLE OPERATION**

Turn left handle counter-clockwise for hot water, and turn right handle clockwise for cold water.

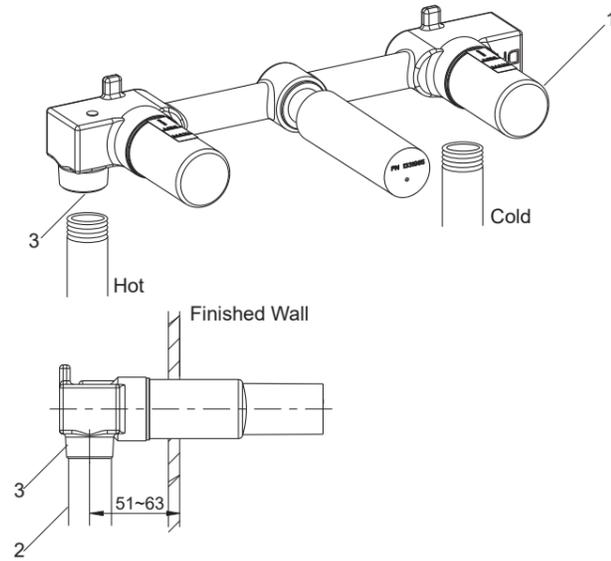

**STANDARD APPLICABLE**

Special model meets or exceeds the following at date of manufacture: TIS

**ROUGH-IN DIMENSIONS**

## INSTALLATION

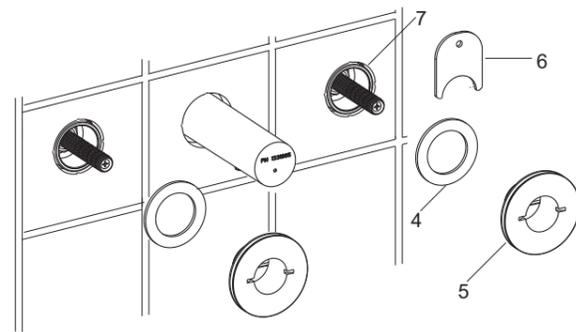

### How to Install the Yoke

Determine where the yoke will be located on the wall. Dig a suitable hole to install the yoke in the wall. Keep the protectors(1) facing front. Do not take off protectors at this moment.

Connect the G1/2" water supply pipes(2) to the supply yoke(3).

Keep the distance from centerline of the water supplies to the finished surface between 51mm and 63mm. Make sure the left supply pipe is hot water supply and connected to the end with red mark.

The out surface of the finished wall should be between the MAX and MIN marks on the protectors(1).

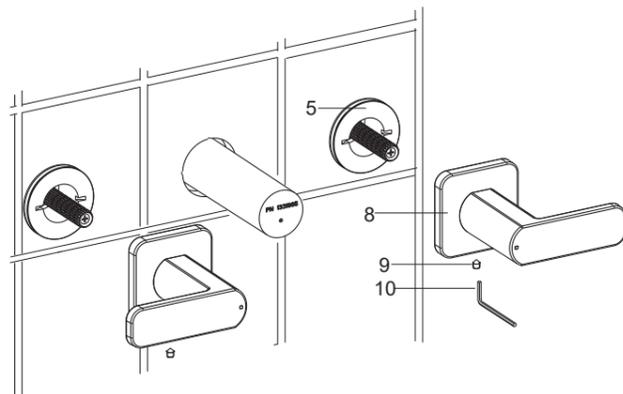

### How to Install the Handles

Remove and discard the handle protectors after completing the wall.

Put the rubber washers(4) into the rear groove of the escutcheon bases(5). Screw the escutcheon bases onto the valves(7) by key(6) until it is against the finished wall.

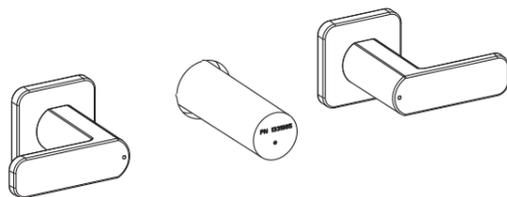

**NOTE:** Uninstall the screw and extension if the recessed depth is shallow.

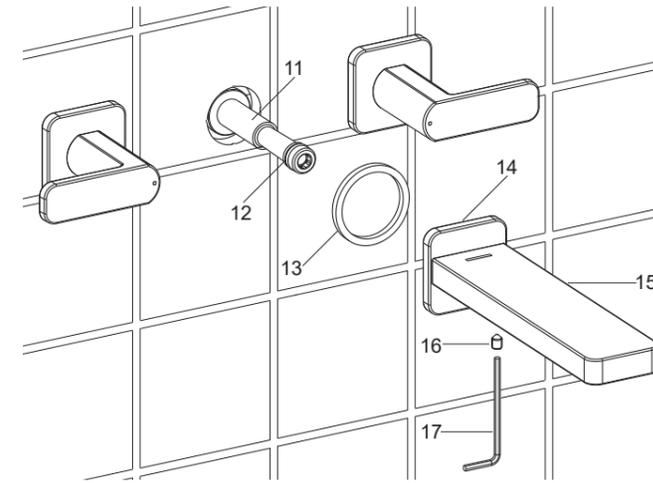

Place the handle kits(8) onto the escutcheon bases(5) with the valves closed.

**NOTE:** The handle kit with red mark should be installed on the left side.

Tighten the screws(9) by hex wrench(10) to secure the handle kits.

The figure shows the correct position of the handles when the installation is completed.

### How to Install the Spout

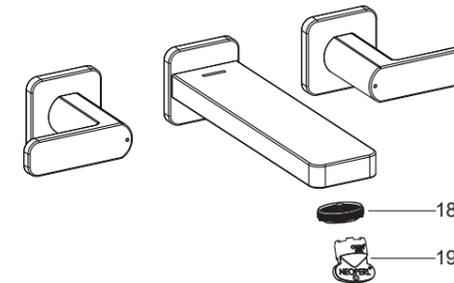

Remove and discard the spout protector.

Insert the washer(13) into the groove of the escutcheon(14).

Loosen the screw(16) in the spout kit(15) by hex wrench(17). Install the spout kit to the connector(11) with the spout outlet downward until it is against the finished wall.

**NOTE:** Don't damage the O-ring(12) on connector. Tighten the screw to secure the spout kit.

## INSTALLATION CHECKOUT

Ensure that all coupling nuts are tight. Ensure that the handles are in the off position. Turn on the main water supply and drain, and check for leaks. Repair as needed.

Remove the aerator kit(18) by tool(19). Run hot and cold water through faucet about one minute to remove any debris. Remove any debris from the aerator. Shut off the faucet. Reinstall the aerator.

## CLEANING INSTRUCTIONS

All Finishes: Clean the finish with mild soap and warm water. Wipe entire surface completely dry with clean soft cloth. Many cleaners may contain chemicals, such as ammonia, chlorine, toilet cleaner etc, which could adversely affect the finish and are not recommended for cleaning.

Do not use abrasive cleaners or solvents on Kohler faucets and fittings.
