23492T-4 Floor Mount Bath Filler With Handshower

BEFORE YOU BEGIN

All information is based on the latest product information available at the time of publication. Kohler Co. reserves the right to make changes in product characteristics, packaging, or availability at any time without notice. Please leave these instructions for the consumer. They contain important information.

NOTES:

1. Flush the water supply pipes thoroughly to remove debris.
2. Inspect the supply tubing for damage. Replace as necessary.
3. Observe local plumbing codes.
4. The minimum working pressure for the diverter is 0.05MPa(0.5bar).
5. Check for leaks before covering the pipes, repairs as needed.
6. The highest working pressure for handshower is 0.5MPa(5bar). If it exceeds 0.5MPa(5bar), a pressure reducer is needed. The highest water and environment temperature is 60°C. Please keep handshower and shower arm away from heater, or it may become damaged and cause injury to the user.
7. Please purchase the matched mounting base 97905T when install the faucet.

STANDARD APPLICABLE

Special model meets or exceeds the following at date of manufacture: TIS

ROUGH-IN DIMENSIONS

* Please purchase the appropriate bathtub according to the dimension.

HANDLE OPERATION

Lift the handle gently. Turn clockwise for hot water, counter-clockwise for cold water.

Pull the diverter for handshower. Push the diverter back in the normal position for bath spout.

Press the buttons of the handshower to change the water flow.

INSTALLATION

How to Install the Faucet

Shut off water supply. Cut away the extending part of the base protector(1) in accordance with the tile surface. Remove plug(2) from the base. Remove protector(3) from the faucet.

Slide up escutcheon kit(4). Install the faucet. **NOTE:** Keep the faucet vertical to base, to avoid damaging the O-rings on the bottom.

Keep the spout pointing to tub. Fix the faucet to the base with screws(5) and washers(6) through flange(7). Tighten the screws with hex wrench(8).

Slide down the escutcheon kit, make sure it is against the finished floor.

How to Install the Handshower

If needed, install the restrictor(9) into the inlet of the handshower(10). Connect hose(11) to diverter kit and handshower with washers. Tighten all the connections.

Hang the handshower on the bracket(13) of the faucet.

INSTALLATION CHECKOUT

Ensure that all coupling nuts are tight.
Ensure that the handle is in the off position.

Turn on the main water supply, and check for leaks. Repair as needed.

Remove the aerator(15) by key(14). Remove the handshower(10). Turn on faucet handle. Run hot and cold water through spout for about one minute to remove any debris. Remove and clean the screen washer. Check for leaks at this time. Remove any debris. Shut off the faucet. Reinstall the aerator and handshower.

How to Maintain the Handshower

Any debris or mineral build-up may cause the flow stream distorted or reduce the flow rate. To remove the debris or mineral build-up, run water through the handshower, firmly press or rub your finger back and forth across the rubber nozzles.

CLEANING INSTRUCTIONS

All Finishes: Clean the finish with mild soap and warm water. Wipe entire surface completely dry with clean soft cloth. Many cleaners may contain chemicals, such as ammonia, chlorine, toilet cleaner etc, which could adversely affect the finish and are not recommended for cleaning.

Do not use abrasive cleaners or solvents on Kohler faucets and fittings.
