## Tips to Finding the Right Part

### Check if Your Toilet Is a One-Piece or Two-Piece Toilet

One-piece toilets integrate tank and bowl into a seamless design.

Two-piece toilets feature the traditional design of a separate tank and bowl.

### Determine Your Toilet's Flushing Technology

All KOHLER flushing technologies are described, along with their common replacement parts, on pages 4-11. To determine your toilet's flushing technology, look inside the tank and compare your flushing technology with those pictured in this catalog.

### Look for Model and Service Information

If you have a toilet manufactured:

After 1990, service information is imprinted on the underside of tank lid.

The toilet number is imprinted on the inside back of the tank.

### Find Your Toilet in the Matrix

If you do not find the part you need pictured on pages 4-11, use the information you have gathered to find your toilet in the corresponding section of the matrix. The replacement part numbers for the float/fill valve, flush valve, tank gasket and flush ball/flapper are listed for each toilet. To view all the service parts for your toilet, visit [KOHLER.com/serviceparts](http://KOHLER.com/serviceparts) for the expanded service parts pages.

# Canister (Single-Flush) Toilets

CLASS SIX<sup>®</sup>  
KOHLER<sup>®</sup>

CLASS FIVE<sup>®</sup>  
KOHLER<sup>®</sup>

If you have a single-flush canister toilet, you will not see a flapper in the tank but a cylinder-shaped flush valve. These toilets do not use a flapper, but a seal. ***If your toilet is leaking water into the bowl, the seal needs to be replaced, not the canister.***

**AquaPiston<sup>®</sup>**  
\*AquaPiston canister allows water to flow into the bowl from all sides (360 degrees), increasing the power and effectiveness of the flush.

# Canister (Dual-Flush) Toilets

DUAL FLUSH  
KOHLER.

If you have a dual-flush toilet, you will see a two-button actuator on the top or a two-part trip lever on the side, rather than a standard trip lever. Inside the tank you will not see a flapper but a cylinder-shaped flush valve. These toilets do not use a flapper, but a seal. ***If your toilet is leaking water into the bowl, the seal needs to be replaced, not the canister.***

YOUR CAP COLOR  
DOES NOT MATTER.

Use GP1138930

The innovative dual-tone trip lever features two flush options. The longer green lever provides a light 1.1 gallon flush; the full lever provides a full 1.6 gallon flush.
