

INSTALLATION

General

1. Make sure that the bath is installed by a competent installer.
2. Before installation carefully inspect the new fixture for any signs of damage.

Install the Bath

1. Install the cross bar onto the bottom of the bath by feeding it through the bracket.
2. Make sure the cross bars are evenly spaced about the centre of the bath and secure them in position with the bolts.

3. Install the feet onto the cross bars and secure them in position with the nuts.

4. Install the end of the steel bars onto the plastic parts.

5. Install the "V shape" onto the threaded bars.
6. Manually Tighten the nuts until the "V shape" is in full contact with the underneath of the bathtub rim and tighten a further 1/2 turn with a spanner.
7. Install and tighten the washers and nuts onto the threaded bars above the plastic parts.

8. Position the bath in the desired location and make sure that it is level. Adjust the feet on the bath to obtain a height of 545 mm (+ 2 mm/ - 0 mm) between the floor and the rim of the bath.
9. With the bath in position and level, secure the feet to the floor with suitable screws.

10. If required, mark the positions of the holes for the taps and drill with a suitable tool.

Note! The positions of the mounting holes for the taps depend on the type of bath that you are installing. The mounting holes can be at either end of the bath or on a central ledge.

11. Fit the taps and the waste onto the bath in accordance with the manufacturer's instructions.

Note! If the bath is to be installed with a side against a wall and the bath does not have an integral upstand, we recommend the use of a tiling-in bead. Refer to the instructions packed with the tiling-in bead.

12. Connect the services to the taps and the waste.

13. Apply sealant in accordance with the manufacturer's instructions to seal the bath to the surrounding structure.
14. Complete the finished wall surface (e.g. tiling) around the bath as required.
15. Fill the bath with water and seal around the bath edge with silicone sealant. Allow the sealant to cure before draining the bath.
16. If necessary, install the bath panel. Refer to separate instructions.

GUARANTEE OF QUALITY

Kohler UK guarantee products against any defect of materials or workmanship for the following periods:

25 Years

Ceramic Ware and Cast Products

10 Years

Stainless Steel Products and Acrylic Baths

5 Years

Shower Valves, Taps, Cistern Fittings, Toilet Seats and Bath Panels

2 Years

Bathroom Furniture and Accessories

1 Year

Whirlpool / Spa Baths

Our confidence in the quality and reliability of our superior products enables us to offer a comprehensive guarantee for all products.

To register and fully benefit from this guarantee you must return the enclosed product registration card indicating the Kohler items you have purchased.

Within the guarantee period we will undertake to resolve any material defects, by providing replacement parts, modules or complete product, as we deem appropriate. To be free of charge, work must be undertaken by Kohler UK approved personnel.

To ensure that any problems can be promptly resolved you must contact Kohler UK directly.

Proof of purchase must be provided with any claims.

This guarantee covers products in domestic use, installed, operated and maintained in accordance with the instructions. It covers the purchaser only and is not transferable.

Commercial / Business Use

Any Kohler Bathroom product used within a commercial / business premise is guaranteed for 1 year against any defect of materials or workmanship.

Not Covered by this Guarantee

Damage or defects arising from incorrect installation, improper use or lack of maintenance. Installed product damaged in transit, consequential loss, damage or product removal and installation costs. General wear and tear.

This guarantee is in addition to your statutory and other legal rights. Applies to the UK only.

CLEANING

General

Caution! Risk of product damage. Many cleaners contain abrasive and chemical substances, and should not be used for cleaning stainless steel, enamel, plated or plastic fittings. These finishes should be cleaned using a mild washing up detergent or soap solution, rinsed and then wiped dry with a soft clean cloth.

WC's and Bidets

Caution! Risk of product damage. Most toilet bowl cleaners are not harmful to the vitreous china surface of the toilet bowl. Please follow the bowl cleaner manufacturer's instructions carefully.

Caution! Do not use in-tank cleaners. Products containing chlorine (calcium hypochlorite) can seriously damage fittings in the tank. This damage can cause leakage and property damage.

Cast Iron Products

Keep your cast iron product looking new by rinsing it out thoroughly after each use.

Furniture

Door and Cabinet Care: Usually regular cleaning with a damp cloth is sufficient. Never use strong detergents or abrasive cleaners as this may damage the surface finish of your furniture.

Bathroom furniture may deteriorate if subjected to heavy water spillage or prolonged condensation. Any edges that may come into contact with water must be sealed. We strongly recommend that all installations are well ventilated, failure to do so may invalidate your guarantee.

Glass Care: When cleaning glass panels or mirrors, use a damp cloth with washing-up liquid or soft soap. Do not use washing powders or any other substance containing abrasives, as these will scratch the glass.

GENERAL

Make sure that the item is installed by a competent installer.

Make sure that these instructions are left with the user.
