PERFORMANCE SHOWERING September 2006

DTV™ Digital Interface

Utilising cutting edge technology to control up to eight showerheads, hand showers and bodyjets, the DTV offers a truly unique and simple to use home-spa showering experience. With pre-defined massage and temperature programmes and six personalised memory settings, it can also be configured to personal preferences. The streamlined digital interface can be installed inside or outside of the showering space using either a portrait or landscape orientated Digital Interface for maximum installation possibilities. An auxiliary Digital Interface enables the user to activate the programme before entering the shower from a different location outside of the showering space.

Dimensions

Install this product according to the Installation Guide.

Wall sleeve will accomodate finished wall thickness of 0.5 - 5 cm.

End wall installation requires a 2 x 6 wall construction.

> All measurements shown are in millimetres. Sizes are approximate.

DTV™ Digital Interface

Performance Showering

Up to 8 water outlets (6 separate circuits) with no need for additional divertors. Massage and temperature based programs easily selectable by user.

Standard shower configurations:

- Surround
- Envelop
- Unwind
- Frontage
- Downpour
- Linear
- Full customisation also available

Easy to Use

Touch sensitive controls, magnetic dial control and display screen allow simple access to all features.

Up to 6 user presets give simple touch access to favourite experiences (combinations of outlets and programmes).

Optional auxiliary interface gives full control from remote location, allowing user to select desired experience prior to entry into the showering area.

Safety and Hygiene

High-temperature limit setting for added safety.

Removable Magnetic Control allows user to easily clean one-piece interface.
