CUSTOMER SERVICE

Guarantee

Your product has the benefit of our manufacture's 1 year quarantee which starts from date of purchase. This guarantee only applies in the United Kingdom and Republic of Ireland. Within the guarantee period we will resolve defects in materials or workmanship, free of charge, by replacing parts or product as we may choose.

This guarantee is in addition to your statutory rights and is subject to the following conditions:

- The product must be installed and maintained in accordance with the instructions given in this
- Replacement under this quarantee does not extend the original expiry date .
- The guarantee on any replacement parts or product ends at the original expiry date.

The guarantee does not cover:

- Non product faults (such as damage or performance issues arising from incorrect installation, improper use, inappropriate cleaning. lack of maintenance, build up of limescale, frost damage, corrosion, chemical attack, system debris or blocked filters) or where no fault has been found with the product.
- · Accidental or wilful damage.
- · Compensation for loss of use of the product or consequential or indirect loss of any kind.
- Damage or defects caused if the product is repaired or modified by persons not authorised by us or our appointed representative.

What to do if something goes wrong

If your product does not function correctly when you first use it, check that it is installed and commissioned in accordance with the instructions in this manual. If this does not resolve the issue, contact us for help and advice.

Helpdesk Service

Our Customer Services Team is comprehensively trained and can offer help

and advice, spare parts and accessories. We will need you to have your model name or number and date of purchase. Please provide your model name and date of purchase.

MIRA AGILE & ADEPT ERD & **AGILE SENSE ERD+ SHOWER FITTINGS**

Introduction

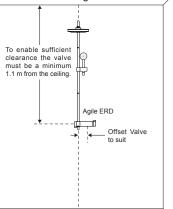

Thank you for purchasing a quality Mira product. To enjoy the full potential of your new product, please take time to read this guide thoroughly, having done so, keep it handy for future reference.

Mira shower fittings are designed to give a satisfactory shower over a range of pressures. These fittings are suitable for pressures between 0.1 and 5.0 bar

General

- Make sure that the shower fittings are installed by a competent installer.
- Installations must comply with Water Regulations (Bye-Laws, Scotland), and any other Local Regulations and Building Regulations in force at the time of installation.
- Before installation carefully inspect the new fixture for any signs of damage.
- The shower fittings should be positioned at a convenient height for all the family. Position the fittings to spray across rather then towards the opening of the cubicle and also away from the shower control. Avoid layouts where the shower hose will be sharply kinked. This may reduce the life of the hose.

Shower Positioning

- A hose retaining ring is supplied to prevent the handset from dropping below the spill over level of the bath or shower, which could lead to contamination from backsiphonage. The supplied hose retaining ring should meet the great majority of user requirements for shower installations with flexible outlet fittings. However, there will be occasions when the hose retaining ring will not provide a suitable solution. In these instances an outlet double check valve. e.g. The Mira DCV-H. must be fitted. The inclusion of the Mira DCV-H will increase the required supply pressure typically by 0.1 bar.
- Do not fit any form of flow control in the outlet pipe work if the shower fittings are installed in conjunction with a product that requires the fittings to act as a vent (e.g. an electric shower).
- Special consideration should be given to the fixing arrangements when installing onto a dry lined, stud partition, shower cubicle or laminated panel wall structures. Installers may wish to obtain alternative proprietary cavity fixings, or choose other options, however, these methods of fixing are beyond the scope of this guide.

Cleaning

Many household cleaners contain abrasives and chemical substances, and should not be used for cleaning plated or plastic fittings.

These finishes should be cleaned with a mild washing up detergent or soap solution, and then wiped dry using a soft cloth.

Use your thumb or a soft cloth to wipe any limescale from the soft nozzles and the front surface of the handset spray plate.

Spare Parts

Spare part numbers are indicated in bold and are available from authorised stockists or merchants (locations on request) or direct from Mira Customer Services, our contact details can be found on the back cover of this guide.

Diverter Outlet Installation

Diverter Wall Fixing 1736.733

Ŋ

- With the thread facing down push the diverter outlet into the end of the Agile mixer valve or Adept outlet
- Tighten the outer grubscrew until it bottoms out (2.5 mm hexagonal key), then tighten a further 1/2 turn to secure the diverter to the mixer valve / outlet.

Riser Bar Installation
