60" x 42" whirlpool bath with heater **76281110-H**

Required Electrical Service

Two dedicated circuits required, protected with Class A Ground-Fault Circuit-Interrupter (GFCI). Outside North America, this device may be known as a Residual Current Device (RCD).

Pump: 120 V, 15 A, 60 Hz Heater: 120 V, 15 A, 60 Hz

Technical Information

All product dimensions are nominal.

Installation: Drop-in, Three-wall alcove

Drain location: Left

Basin area, bottom: 44" x 25-3/4" (1118 mm x 654 mm) Basin area, top: 51" x 32-3/4" (1295 mm x 832 mm)

Water depth: 15-1/4" (387 mm) Water capacity: 68 gal (257.4 L)

Electrical component Pump: 120 V, 7 A, 60 Hz

rating: Heater: 120 V, 12.5 A, 60 Hz, 1500 W

Pump speed: Single Minimum flat for door: 3" (76 mm)

Notes

Install this product according to the installation instructions.

Provide one grounded electrical outlet within 24" (610 mm) of each component.

Measure your actual product for roughing-in details.

Pump service access is required.

Pump and heater are each supplied with 24" (610 mm) grounding-type plug-in cords. Locate the outlets behind the whirlpool, and within 24" (610 mm) of the pump and heater.

Size the drain cutout to fit the drain assembly. Stud positioning is critical if nailing-in flanges are to be used.

Studs should be positioned roughly as shown for support clip or roofing nail installation.
