

CARE & CLEANING

SINKS OR LAVATORIES MADE OF STAINLESS STEEL

STERLING® stainless steel sinks are constructed of high-grade stainless steel with a nickel and chrome content for excellent corrosion resistance. The satin and buffed finishes are made to withstand the wear and tear of everyday use. Regular cleaning will retain the sink's good looks for years to come.

RECOMMENDED PRODUCTS:

- Formula 409 All Purpose Cleaner
- Lysol Anti-Bacterial Kitchen Cleaner
- Spic and Span Liquid
- Fantastik All Purpose

- Clean stainless steel once a week.
- Always apply stainless steel cleaner/polish with a non-abrasive cloth or sponge, working with, not across, the grain.
- Do not use steel wool wire brushes or abrasive sponge pads.
- Cleaners containing chloride are not recommended. If used, rinse the surface immediately to prevent corrosion.

CARE TIP:

Allowing water to evaporate on metal will form water deposits. To avoid this, it is important to use a dabbing action to dry metal, not an abrasive or rubbing action. Cleaning with a damp sponge and drying should keep your product looking beautiful.
