

KD SERIES™ GENERATORS

for Industrial Power Systems

KOHLER®

TOTAL SYSTEM INTEGRATION

We've covered every detail down to the last bolt. This isn't your typical power system. It's a KOHLER® industrial power system, which means it's designed, tested, and manufactured with KOHLER components—including generators, transfer switches, paralleling switchgear, and controllers. But the best part? We customize every power system to your specifications. So no matter how large or complex the job, everything works together seamlessly.

When you choose a KOHLER generator, you know it's backed by a premium warranty, factory support, and an extended network of knowledgeable, factory-trained service techs. And with distribution centers located all over the world, you'll always get the parts you need fast.

When you're ready to customize a system that meets your specific needs, give us a call. With specialized knowledge and an agile manufacturing process, we'll make it happen.

KD SERIES™ GENERATORS

700–4000 kW

Built For The Most Critical Jobs On Earth.

REVOLUTIONARY AND RELIABLE

With almost a century of engineering know-how behind it, our G-Drive engines are built with an eye on the future—designed to last for decades to come. We engineer, test, and fit every single component. And our computer-aided quality-management system oversees every step of development, from the first stage of production through the engine's entire life cycle, to ensure the highest level of quality.

TESTED AND APPROVED

Created specifically for generator applications, our G-Drive engines combine power with superior efficiency. Reaching up to 41.7 kW/liter, KOHLER® G-Drive engines pair a compact engine form factor with unrivaled kilowatt displacement—delivering the highest power density on the market.* All KOHLER generators meet tough industry testing and quality standards (UL2200, CSA, NFPA).

SMOOTH-RUNNING

The KOHLER G-Drive engine runs smoothly, quietly, and with low vibration—even under extreme operating conditions—extending service life and delivering cost-effective performance.

HVO-READY

HVO provides a cleaner and more sustainable alternative to conventional diesel and biofuels. No adaptation is needed and both HVO and diesel can be mixed together. HVO is also highly stable with no sensitivity to oxidation, so it can be stored long-term. It is also up to 90% carbon neutral and sourced entirely from waste products.

ULTIMATE PERFORMANCE

The KOHLER G-Drive diesel engine's architecture, injection system, and engine management have been designed to achieve optimal generator performance.

FUEL-EFFICIENT

The common rail fuel system generates up to 2200-bar injection pressures for maximum efficiency, optimizing the combustion pressure curve through multiple injections. This produces industry-leading kilowatt displacement in a package that enables a smaller generator footprint while delivering the best fuel consumption at more nodes than any competitor above 700 kW.

COMMON SERVICE PART NUMBERS

A modular system allows us to scale the number of components depending on the power required. Using standard components means fewer parts must be stocked in the field, and operators require less training. This reduces costs and improves response time.

CONTROL AND MAINTENANCE

KD Series generators feature integrated controls for seamless communication and offer remote monitoring through a VPN connection. Easy-access bearing lube points, coolant level optical gauges on both circuits, and oil replenishment systems help ensure the generator runs optimally and is easy to maintain.

*Higher power density at more nodes than any competitor between 700 and 4000 kW.

KD1750

- 1 Emission-Certified**
 Clean-running engines, featuring closed crankcase ventilation, meet EPA emissions standards
- 2 Fuel Systems**
 Common rail injection systems, designed specifically for the KOHLER® large diesel range with minimal low temperature fuel return
- 3 High-Ambient 50° Cooling Systems**
 Designed to meet extreme operating conditions, segmented radiator core sections allow for single replacement instead of entire core
- 4 Efficient PMG Alternators**
 Provide advanced short-circuit capability and meet NEMA MG 1, IEEE, and ANSI standards; multiple alternator options are available, providing increased motor starting capabilities
- 5 Kohler Controller**
 Large touch-screen controller with intuitive user interface for paralleling, load, and generator management
- 6 Low Combustion Air**
 Right-sized turbo chargers require less air to run, creating lower emissions and enabling optimal performance inside an enclosure
- 7 Fuel Pump**
 Efficiently generates high fuel lift and provides flexibility to configure remote fuel delivery systems
- 8 Options and Accessories**
 Multiple circuit breakers, battery heaters, block heaters, battery charger, and centrifugal oil filter

KOHLER® G-DRIVE ENGINES

Massive Power In A Compact Package.

KOHLER G-Drive diesel engines are manufactured with the highest-quality materials and systems. Engineered over a ten-year period for use exclusively in generator applications, these engines are built for the toughest environmental conditions. If it's dependability you're after, look no further. Our G-Drive engines have proven their power and reliability during nearly 100,000 hours of arduous tests—both in the laboratory and on-site. All of which makes them ideal for a variety of crucial applications such as data centers, hospitals, power plants, and mining sites.

SKIN-TIGHT ENCLOSURES

Reduce The Racket. And Put Mother Nature In Her Place.

If you want to keep the weather out and the noise in, there's really only one way to go. KOHLER® enclosures are bolstered by heavy-duty aluminum and acoustic insulation to protect your investment and keep the noise down. In addition, we coat every unit with Power Armor™—a textured industrial finish—for heavy-duty durability in harsh conditions. The enclosure design for 800 kW and above includes a sloped roof to increase the life and safety of the generator.

STANDARD FEATURES

Fitted Enclosures

Sound enclosures feature durable aluminum construction, stainless steel external hardware, and an LED emergency lighting system.

Certified Packages

Enclosures are certified for UL2200, IBC, and OSHPD up to 2500 kW from the factory, meaning no on-site certifications are needed. All enclosures meet 186-mph wind rating and are impact-rated per Florida Building Code up to 1750 kW.

Quiet Performance

Our SL1 and SL2 enclosures offer acoustic insulation to meet your needs for quiet applications.

Advanced Corrosion Protection

Power Armor is a textured automotive-grade finish that surpasses a 3000-hour salt spray exposure test and resists fading and scratching.

1 SERVICE ACCESS

Multiple personnel doors and removable panels offer easy access to generator control, fuel fill, fuel gauge, oil fill, and battery

2 INTERNAL EXHAUST SYSTEM

Features insulated exhaust silencer for improved aesthetics, safety, and noise reduction

3 OIL AND RADIATOR DRAINS

Provide an easier, quicker way to service the generator

4 AIR INLETS

Louvered air inlets limit water ingress and shorten overall length of enclosure

5 SLOPED ROOF FOR 800 kW AND ABOVE

Reduces water pooling and increases enclosure life

6 AVAILABLE ACCESSORIES

Electrical packages, heaters, motorized louvers, AQMD options, stairs, and more

KD1750

eFRAME™ WALK-IN ENCLOSURES

Understanding the needs of our consumer, Kohler has designed a range of exclusive eFRAME enclosures specifically geared to accommodate KOHLER® generators. Your power generation needs are now available from a single source, which allows for complete customization with the luxury of shortened lead times. With KOHLER, your generator system can be installed, serviced, and maintained by the name that you trust.

BENEFITS

Top-of-the-line

Shortened lead times

Available from a single source

Ease of installation, service, and maintenance

Flexible

Our enclosures accommodate a variety of uses through the optimization of additional features, such as the capability to modify switchboard and breakers to meet customer requirements with additional state/local code options available for the subbase tank.

Reliable

Each eFRAME enclosure goes through vigorous testing and approval to ensure reliability. Receiving the UL 2200 FFTP certification for construction, this modular frame has been designed to meet and withstand over a 135-mph wind load rating. Addition ally, the enclosure is IBC-certified for site-specific use, and its subbase tank meets UL 142, ULC, and state-specific requirements. Computational fluid dynamic (CFD) tools review the enclosure airflow to ensure generators will operate efficiently in the most demanding environments. Our internal engineering analyses (including FEA) are used to optimize cost while ensuring we meet shipping and wind load requirements.

Accessible

Our custom-designed modular enclosures allow for ultimate serviceability and ease of access to the engine and radiator without the need to disconnect, promoting rapid troubleshooting while ensuring continuous power.

Modular

Reduce service costs and downtime with the modular design of our enclosures, which are capable of being split into three independent sections, making the replacement or service for any generator component quick and easy.

Easy as 1, 2, 3

Just a few simple steps is all it takes!

- SET—Set the tank, mount the generator, and then set the enclosure
- WIRE—Wire alternator load leads to the freestanding breaker
- CONNECT—Ensure connections: customer connections (including load leads), shore power, and communication cables

KD SERIES™

EPA-Certified Tier 4 Final Generators

THE SIMPLEST TIER 4 GENERATOR ON THE MARKET.

No DPF. No DOC. With only an selective catalytic reduction (SCR), we've removed all those complicated aftertreatment specifications. Not only that, since these generators are built for prime power and peak shaving, your clients can save big on utility bills.

The Necessity of Tier 4

Nonemergency

Since 2014, all stationary nonemergency generators operating in the U.S. must be powered by an EPA-certified Tier 4 Final engine. Common stationary nonemergency generator applications include:

- Primary source of power to facility
- Peak shaving
- Curtailment/interruptible rate programs
- Supplying power to electrical grid

KD1250-4 with SL2 Enclosure

KD Series Tier 4 Final

- EPA-certified Tier 4 Final
- Simple SCR-only solution. No diesel particulate filter (DPF) or diesel oxidation catalyst (DOC) required
- Open or enclosed units—Only Kohler offers factory-direct Tier 4 packaged units above 1000 kW
- KD3250-4 is largest Tier 4 unit on the market

MODEL	ESP Rating (kWe)	PRP Rating (kWe)	COP Rating (kWe)	Engine	Open / Enclosed
KD1250-4	1250	1120	934	K135 16V	Open / Enclosed
KD2500-4	2500	2270	1892	K175 12V	Open / Enclosed
KD3250-4	3250	2950	2460	K175 16V	Open

WHY KOHLER® KD SERIES™ TIER 4?

- Simplest system in the industry
- No need for:
 - DOC or DPF
 - Regeneration
 - Compressed air
 - Additional sound attenuation
- KOHLER Tier 4 engine aftertreatment system (EATS):
 - Addresses PM in-cylinder
 - NOx addressed with SCR
- Engine ECU and integrated sensors control all aspects of EATS
- Allows greater flexibility for installations

KD3250-4

Open Configuration

- Base generator remains unchanged from Tier 2 configuration
- All base generator options available from Tier 2 units
- Available with APM603 controller only
- EATS is essentially an exhaust accessory
- Supports and platforms sold separately

KD2500-4

Enclosed Configuration

In addition to open unit features, enclosed configurations offer:

- Factory packaging available for KD1250-4 and KD2500-4
 - SL2 enclosures only
 - Diesel fuel state tank is standard
 - KD1250-4 (24- or 48-hour)
 - KD2500-4 (24-hour)
- Locates DEF tank and lines
- Correctly sizes DEF and diesel tanks
- All enclosure add-on items are compatible (lights, dampers, etc.)
- Service box for EATS control and filter access

KD1250-4 with SL2 Enclosure

KOHLER® GENERATOR CONTROLLERS

Advanced Technology Made Simple.

At Kohler, we don't do one-size-fits-all. With our controllers, we design custom packages tailored to your needs—from basic controllers managing a single node to more advanced models that enable paralleling multiple generators.

Kohler makes each controller easy to operate, with user-friendly displays and intuitive navigation. Plus, all of our controllers feature advanced network communications for remote monitoring as well as adjustable parameters to accommodate your specific application.

STANDARD FEATURES

Tested and Approved

Our controllers meet NFPA, UL, and CE standards.

Integral Voltage Regulator

KOHLER controllers deliver precise voltage regulation to protect your sensitive equipment from poor power quality.

Seamless System Integration

Every controller works with our entire range of automatic transfer switches and switchgear for complete system integration.

Alternator Protection

This must-have technology protects the alternator from thermal overload.

KOHLER® APM603 INTELLIGENT CONTROLLER

Customized The Way You Want It.

APM603

REMOTE COMMUNICATIONS

Monitor Software

Monitors and controls generators and transfer switches from a personal computer.

Remote Annunciator

Offers an economical solution for remote annunciation of faults and status conditions for NFPA-110 compliance.

- 1 7½" color TFT touch screen
- 2 High visibility alarm leds
- 3 Master control buttons
- 4 Alarm silence/lamp test button
- 5 USB and SiteTech connections

KOHLER® APM802

DIGITAL CONTROLLER

Technology So Advanced, It's Easy.

The APM802 provides advanced controls, system monitoring, and system diagnostics along with remote access—all in a large touch-screen display with intuitive local data access. All critical system information is available locally, as well as remotely, providing you a real-time view of generator performance.

APM802 Digital Controller

STANDARD FEATURES

- 12" touch-screen display for access to information at your fingertips
- Remote access for monitoring and control from anywhere, including a mobile device
- Communication with serial (RS-485) and Ethernet (RJ-45) to support Modbus
- Data logging and trending for easy troubleshooting
- Exporting of logged data, event log, and screenshots onto USB
- Advanced input and output configuration to customize your needs

SUB-BASE FUEL TANKS

Made To Match Your Environmental Needs.

If it's environmental protection you want, you're in the right place. KOHLER® tanks feature two pressure-tested containment walls to keep your fuel where it should be—inside. Plus, they're coated with Power Armor Plus™—a textured epoxy-based, rubberized finish—for heavy-duty durability.

STANDARD FEATURES

Environmental Protection

Our tanks are UL-approved secondary containment tanks and can be configured to meet cUL, IBC, OSHPD, and other required codes.

Multiple Sizes

Usable tank capacities provide up to 96 hours of operation. Efficient fuel pump generates high fuel lift, which allows for tremendous flexibility to configure remote fuel delivery systems.

Custom Options

Choose from alarm panels, spill-fill containments, high-fuel switches, tank markings, and more.

Premium Protection

Our Power Armor Plus polyurea-textured coating eliminates the need for exterior epoxy treatment and provides excellent abrasion resistance and corrosion protection.

- 1 State Tank**
Spill-fill containments, three-alarm panel, fuel basin switch, and tank markings
- 2 Emergency Pressure Relief Vents**
Ensure proper venting of inner and outer tank during extreme conditions
- 3 Normal Vent with Cap**
Raised above the lockable fuel fill cap
- 4 Electrical Stub-Up**
Features large stub-up area for easy installation
- 5 Leak Detection Switch**
Annunciates a contained primary tank fuel leak at generator control
- 6 Fuel Switch**
Interfaces with controller to provide fuel level indication

Sub-Base Fuel Tank
