

# ReadyLatch® Toilet Seat Collection

The KOHLER® toilet seats with ReadyLatch hinges install faster, easier, and more securely than any seat you've ever used. Plus, they are incredibly easy to remove for cleaning. The innovative hinge design lets you install the seat securely from the top of the bowl—no reaching underneath—using only a common household screwdriver.

## Error-Proof and Secure

Toilet seats with ReadyLatch hinges use Grip-Tight installation hardware and seat bumpers to keep the seat fastened in place and prevent it from loosening and shifting over time. The top caps cannot close if the seat isn't locked in place, ensuring a reliable fit every time the seat is fitted in place.

## Easy Installation

The seat mounts entirely from the top of the bowl using only a common household screw driver, allowing the seat to be easily adjusted to fit nearly any toilet.

## Easy To Remove and Replace

Removing the toilet seat for cleaning requires only a quarter turn of the locking mechanisms and the seat simply lifts off the bowl with an upward motion. Replacing the seat after cleaning is just as easy.

## Versatile Design

Toilet seats that include ReadyLatch hinge complement a wide range of toilet designs with options for both round-front and elongated bowls. The toilet seats also feature a Quiet-Close™ seat and lid that prevents slamming for a slow, soft close every time.
